

## 2017-2108 Gt Evaluations

For the 2017-2018 school year, evaluations were given (formally and informally) to administrators, teachers, students and parents.

The administrators, teachers, and parents are very pleased with the gifted program. They feel like the program provides robust opportunities that are creative and engaging. They agree that gt teacher is doing a good job meeting the needs of the students. They were exceptionally proud of our Odyssey of the Mind team placing second at state and qualifying for World OM in June. They were also proud of our acts of kindness project, where one group of students put together a school cookbook to make money for Arkansas Children's Hospital.

Students enjoy coming to gt. They feel like the program has help them to grow and understand what gifted really encompasses. They enjoy the projects they do in gt and the trips that they take throughout the year. Their favorite project of the year was the cardboard game challenge. If they could change anything about gt, it would be to go on more trips.

The high school students agreed that their gt has been helpful. They feel like the classes are differentiated enough to challenge them. They also enjoyed the field trips.
